The Effective Mentor

A Complete Guide for Mentors

By Professor David Clutterbuck

This remarkably comprehensive learning CD provides the most concise and informative overview to date of what it means to be a mentor.

Through a mixture of video interviews, explanatory text and practical exercises, international mentoring expert Prof. David Clutterbuck explores the background to modern mentoring, the wide range of applications of mentoring, the skills required and the scope of the mentoring role. He draws upon 30 years of research and personal experience, along with the 10 books he has written or co-written on mentoring and coaching at work, to produce 20 hours of enjoyable study.

Whether you are a new mentor or experienced, you will find the insights, concepts and practical guidance contained in this CD will add significant value to your current and future mentoring relationships. Self-diagnostic tools also help you think through your experience, values, motivations and mentoring styles.

The CD is designed for ease of use, in modules that take between one and two hours to complete, so that you can spread your learning over weeks or months, as you experience and reflect upon your mentoring relationships; or over a shorter period, to get you started with confidence in your own ability and understanding of what is required.
